

Sustainability Week

The entire High School participated in Sustainability Week in September 2010. The high school teachers used this program as a way to launch the new year and Knowledge Quest. Every student in the high school traveled to Unity College to tour their campus and then on to the Common Ground Fair. Students from Unity College stayed the night on Vinalhaven and ran sustainability workshops. This program was funded with a grant from the Maine Community Foundation.

Author visit with Cynthia Lord

Made possible through the generosity of **Island Readers and Writers**, author Cynthia Lord visited Vinalhaven School as part of a series of visits (she first visited in the spring) and following the publication of her book "Touch Blue" which takes place on an island off the coast of Maine, something our students could relate to! We are very grateful to the Island Readers and Writers for making this possible!

Photography Residency

Art students learned the basics of developing black and white photography during a two-day residency. The dark room was brought back to life with new chemicals and students interested in developing their skills. As part of sustainability week, students took photographs of local places important to them.
